ALEXANDER & WILKS

Britain's Finest Ironmongery

Issue: 4

ALEXANDER & WILKS

Inspired by legendary British engineers Sir Alexander Issigonis, designer of the original Mini, and Maurice Wilks the designer of the world-famous Land Rover, two of the most iconic designs in history; Alexander & Wilks is an exclusive range of unique designs, manufactured, and curated into one collection. High quality, beautifully designed ironmongery; Everything from traditional, through to the latest CNC machined, highly polished contemporary finishes, combining natural & man-made textures.

With expert advice and next-day delivery available.

CARE INSTRUCTIONS

Metals and Finishes
Keeping any metal clean is important. Dust, which is usually chemically active, and moisture, which is often acidic, are principal natural hazards. Simple but regular cleaning is more successful than severe sporadic treatment.

Pewter
Occasional light wash with soapy water, dry thoroughly and buff lightly to remove any water marks.

Brass (Unlacquered)
Brass is an alloy of copper and zinc, with copper being the main component. Copper reacts to the atmosphere by producing a natual oxidation (patina) on it's surface which when completely covered, resists further attack from the atmosphere. Patina is often a dark green colour, however, can also display different shades. Occasional light wash with soapy water, dry thoroughly- this will still allow the natural patina to remain. If you prefer a fresh brass look, occasional use of Brasso.

Lacquered Finishes
Regular dusting is required. Occasional light wash with soapy water, dry thoroughly and buff lightly to remove any water marks.

Plated Finishes
Regular dusting is required. Occasional light wash with soapy water, dry thoroughly and buff lightly to remove any water marks.

PVD
Regular dusting is required. Occasional light wash with soapy water, dry thoroughly and buff lightly to remove any water marks.

Did you Know?

PVD stands for Physical Vapour Deposition
Our 25 year guarantee products have a PVD coating applied, which creates a very hardwearing finish.
